That's what you need in material:

- Colored paper
- Pencil
- Scissors
- Geo-triangle
- BLANCOL Glue stick

1. First draw 3 squares on your sheet. One square forms the middle and the other two squares are placed on two adjacent sides.

2. The two outer squares are now halved again in the middle to form 2 triangles. Make sure that these triangles are drawn in as in my example. You won't have to use these dark marked ones at the end. You can also use the template as an aid and simply trace it along.

3. Now cut out the template along the edge and glue the two triangles together. Make sure you glue the triangles together so that a paper can still be inserted between the rectangle and the triangles. Your bookmark is already finished.

4. In the end you can decorate and paint your finished bookmark with coloured pencils, other paper, glitter or glue.
