

Aeroplane

Material required:

- Wooden ice cream sticks
- Clothes peg/s
- Cutter
- Paintbrush
- Acrylic paints
- BLANCOL special adhesive NATMAT

1. To start, the wooden ice cream sticks and the clothes pegs are painted in two different colours. To improve contrast, we recommend using two strong colours. Allow both to dry thoroughly.

2. The wooden ice cream sticks are now cut so that you ultimately have four sticks each of approx. 4 cm, two of approx. 2 cm and one of approx. 2 cm with a 45° angle.

3. Now stick the wooden ice cream sticks to the clothes peg using BLANCOL special adhesive NATMAT. Allow everything to dry thoroughly. Your aeroplane is now ready to take off.
