

Cards

Material required:

- Coloured cards
- Foam rubber in different colours
- Pencil
- Felt-tip pen
- Scissors
- Paintbrush
- BLANCOL special adhesive FLEX

1. First sketch your ideas on the foam rubber. Then cut your outline out from the foam rubber.

Tip: If you work with several layers, you can generate a 3D effect. Also try to give your motif some small “colour highlights”, e.g. with BLANCOL Glitter Glue.

2. Then stick the cut-out motifs onto the card using BLANCOL special adhesive FLEX and press the foam rubber down firmly. Allow to dry thoroughly.

3. Finally, you can decorate your cards as you wish, e.g. with BLANCOL Glitter Glue or with a felt-tip pen. Your personal greetings card is finished.
