

## Monster

Material required:

- Felt in various colours
- Cotton wool or cotton wool pads
- Needles
- Thread in the corresponding colours
- Pen
- Scissors
- BLANCOL special adhesive TEXTILE

**1.** Draw the outline of your monster either directly on the felt or first paint a template on a separate piece of paper and then place the template on the felt. You have to cut the monster out twice from the felt so that it can later be sewn together.

**2.** Now give your monster a scary face. For this, you can cut, for instance, the eyes, the teeth, the mouth and the hair from felt and simply stick them on the monster using BLANCOL special adhesive TEXTILE. Press everything together firmly and leave to dry.

**3.** Now sew around just over half of the front and back side of your monster together and then fill it with cotton wool or cotton wool pads. You can stuff as much cotton wool as you want in your monster and thus decide yourself how round your new friend is to be.

4. Finally, sew the other half together, and your scary monster is finished.
