

## Mosaic panel

Material required:

- Blackboard
- Mosaic tiles or small mirrors
- BLANCOL special adhesive MOSAIC

First thoroughly clean the surface that you want to decorate with your mosaic tiles so that the tiles stick better. Please ensure that the surface is dry. You can then apply BLANCOL special adhesive MOSAIC to the surface and spread it easily and evenly using a brush. Leave the adhesive surface to dry for approx. 10 minutes and then place the mosaic tiles as you wish. Leave to dry thoroughly.

Tip: We recommend first masking the panel using a painter's tape. This protects the panel from potential glue contamination and can be easily removed.
