

## Spring Picture frame

What you need in material:

- Picture frame
- Dark brown acrylic paint
- Brush
- Thin branches
- Moss
- Deco-Flowers
- Secateurs (if needed)
- BLANCOL Special adhesive NATMAT
- BLANCOL Hot-melt glue gun KIDS

1. First, colour the picture frame dark brown.

2. While the picture frame is drying, the branches can be shortened to the length of the picture frame with secateurs or by hand. The branches don't have to match the picture frame to the millimetre, they can also overlap a little.

3. As soon as the colour of the picture frame has dried, the knots can be glued on with the BLANCOL hot-melt glue.

4. Decorate the branch picture frame with moss and flowers. Allow to dry well. Insert a suitable photo and the picture frame is ready.
