

## Easter basket

What you need in material:

- Bowl
- Cling film
- Newspaper snippets
- Acrylic paints
- Brush
- White paper DIN A3
- BLANCOL Starch paste
- BLANCOL All-purpose adhesive
- BLANCOL Glitter Glue

1. The bowl serves as a model for the Easter basket. At first wrap the bowl with cling film, so that later on after drying, the form can easily be removed. Place the bowl with the bottom facing upwards. Now paste approx. 2/3 of the bowl incl. the bottom with newspaper snippets. Allow to dry well.

2. As soon as the BLANCOL starch paste has dried, the form can be carefully removed. Then put the pasted form back on the bowl and paint and decorate it individually with acrylic paints and BLANCOL Glitter Glue. To ensure that the pattern is clearly visible, we recommend that you first paint the complete form with a white layer. Let it dry well.

3. Cut an approx. 4 cm wide strip out of the clay paper along its length and attach it to the basket with BLANCOL All-purpose adhesive. Tip: Use clothes pegs to press the strip on and allow drying.

4. Now fill your basket with chocolate, Easter bunnies and eggs and the Easter basket is ready.
