

Pine cone garland

Material required:

- 7-10 different natural pine cones
- Wire (approx. 7 cm per cone)
- Artificial snow
- BLANCOL glue gun + sticks MINI
- BLANCOL spray glue

1. Cut a piece of wire about seven centimeters long and bend it into a U-shape. Twist the wire under the U-shape about three times to create a small tab. Bend the end 90 degrees upwards.

2. Apply a generous V-shaped trail of glue around the base of the stem of the cone and press the wire ends deep into the glue, allowing this to dry thoroughly.

3. To make the pine cones look nice and wintry, you can spray them with BLANCOL spray adhesive and drizzle white glitter or artificial snow over them.

4. Now all you have to do is thread/attach the cones to a string.
