

## Flower vase

Material required:

- Empty glass or a vase
- scissors
- Cord roll of your choice (not too thin)
- BLANCOL special glue

1. Start at the bottom of your vase with the glue and work your way up, row by row. Always alternate between the glue and the cord.

2. Apply the glue generously and always press the cord well.

3. When you get to the top edge, cut the cord and glue the end well.
4. Now you just have to set the matching flowers and the great gift is ready.
